Dear Teacher,

The vocabulary list on the following pages is drawn from the “Opioids and the Overdose Epidemic” student article and work sheet.

This vocabulary can be previewed with students prior to reading or reinforced with students afterward. Encourage students to incorporate these words into their writing about and discussion of the “Opioids and the Overdose Epidemic” student article and the “Opioids in America: Alarming Trends” work sheet.

The vocabulary list integrates two different tiers of vocabulary words that can be used across several content areas, such as analyze, crisis, and precaution, and domain-specific words, such as epidemic, morphine, and opioid.

Some suggestions for students to help their understanding:

• organize concept maps that include word parts, synonyms, antonyms, and examples;
• compose memory aids that explain the words or use them in a meaningful context;
• employ the words to create newspaper articles, stories, or poems.

Sources: Unless otherwise noted, definitions below are sourced or adapted from Merriam-Webster’s Collegiate Dictionary, National Institute on Drug Abuse, and Scholastic Children’s Dictionary
